

# How to Build 2 Simple Lego Ships

By: Caleb M Davis

## Introduction

In this presentation, I will show you how to build 2 simple lego ships that all your lego minifigures and you will enjoy.

Imagine that one of your minifigures needs to get away fast from something like an evil bigfig and the path is in air. Then all you need is to read this how to and build your minifigure a ship, or 2.

Any gray words you  
can click if you need  
the definition

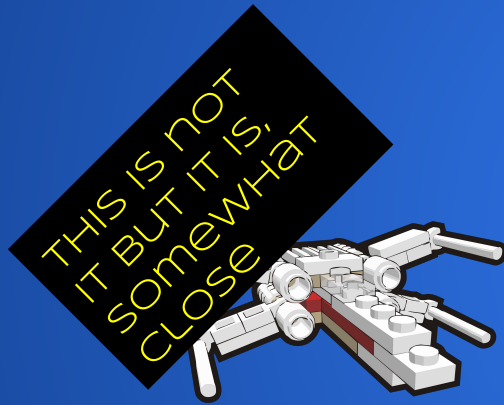

First ship

## Pieces you will need

- 2 2x4 lego bricks
- 2 1x4 lego bricks
- 1 1x2 lego brick
- 1 lego steering wheel
- 1 lego seat
- 1 lego minifigure

# Building It

- 1) First, connect the 2x4s perpendicular to each other with the thin side below the bigger side.
- 2) Place the 2 1x4s on the ends of the wings.
- 3) Put the 1x2 in the space left under the wings.
- 4) Place the steering wheel on the thin end of the ship and the seat goes in back of the steering wheel the lego minifigure sits on the seat. Once you are done with that then you are done with your first simple ship.

Second ship

Pieces you will need

- 2 3x1 plates
- 2 2x1 plates
- 2 black 1x1 plates

**THESE PIECES AREN'T  
ONLY PIECES THEY ARE  
TOOLS**

# Let's Build

- 1) Connect the 3x1s perpendicular to each other one in the middle one on the end the thin side below the big side.
- 2) Place the 2x1s on the ends of the wings make sure you place them so that they are facing the front of the ship.
- 3) Last, put the 2 black 1x1s on top of each other and place the black 1x1x2 on the front as the steering wheel, now you are done.

# Bold Word Glossary

- **Minifigure**: it is a small action figure
- **Perpendicular**: it means one of the things is smashing into the other thing's side like this
- **Bigfig**: it is like a minifigure but

just bigger like this

## Conclusion

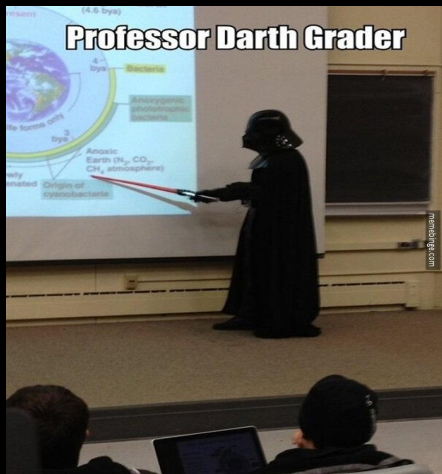

I hope all your minifigures enjoy my ships. Then again I hope you enjoyed building them. Now your minifigures don't have to jump to get away from that bigfig. If you enjoyed then please comment that you enjoyed.
