

How To Play Pokemon

By Nate J

My thoughts on Pokemon

Pokemon is a stunning fun adventure game. where you play by your own rules and befriend magical beasts. Such as pikachu and rowlett. even torous and darkrai.

What You Will Need

. Console that is able to use a pokemon game

. pokemon game of your choice (that works with the console)

How 2 (listen carefully)

As soon as you start the game you get a short tutorial but after that your on your own. First you must get some great balls. which are the pokeballs that you get right after you pass the tutorial. First you might want to catch one other team member . not any more though you will still need the space. Then keep going through the story until you reach the second town then buy a lot of healing items then enter the challenge after you do what the leader tells you and you go

To the near end of the challenge you will need to heal your pokemon

Then battle the boss and have fun!!!!.
