

Let's Play Moving Ring Toss

By: Caitlin Dennis

Get the picture:

If you are reading this you probably want to play a game of ring toss, BUT if you were thinking this was an electronic game then you're in the wrong place. If you are still reading then I guess you actually want to play ring toss and I should probably teach you like I promised, so thats what I'll do. Be prepared to have some pretty cool fun.

Remember, any word that is black and underlined you can click on for a definition!!

Tools For Pretty Cool Fun:

- An open space
- Ring toss game
- 7 rings of fury
- 2 or more pretty cool partners
- A roll of masking tape
- prizes (optional)

Construction:

1. First, find a construction site (aka your living room or someplace open).
2. Next, take your ring toss game and set it on one end of the space, make sure have 7 pegs and they are on the base. Have the moving pegs closer to you and the stand still pegs behind the moving ones.
3. After that, cut off a piece of masking, it should be about 2 feet long. Place the piece of tape about 4 steps away from your ring toss game, on the ground, and horizontal with your ring toss game.

How to play:

First, one person needs to crawl underneath the box part of the ring toss game. Next, the person who will be playing the game will tell the person under the box to start spinning the rings. Then, once the rings start rotating the person who is playing will grab the rings of fury and line up behind the line of tape to start throwing them. Once all of the rings have been thrown switch the person in the box with the person playing the game until you are done playing.

Conclusion:

Now you can play ring toss to brighten your boring day.... and the best part is it's right in your living room, how convenient! Wasn't it as easy as 123? I thought so at least. Well now that you know how to play it so get going and have some pretty cool fun. Good luck!

Glossary:

Click on the word again to return to the previous slide you were on!

Rings of fury: 3+ plastic pool dive rings

Pegs: The poles or sticks that are moving for you to throw the rings onto.

Base: The surface which the bottom of the pegs are connected to.

Spinning the rings: The stick/pole coming through the top of the box must be turned either direction to make the pegs rotate.
