

# How to Run a Business Empire (And What to Do When You Fail)

By Nate H. with the gaming company, "It's Electric"

# The Intro I Guess

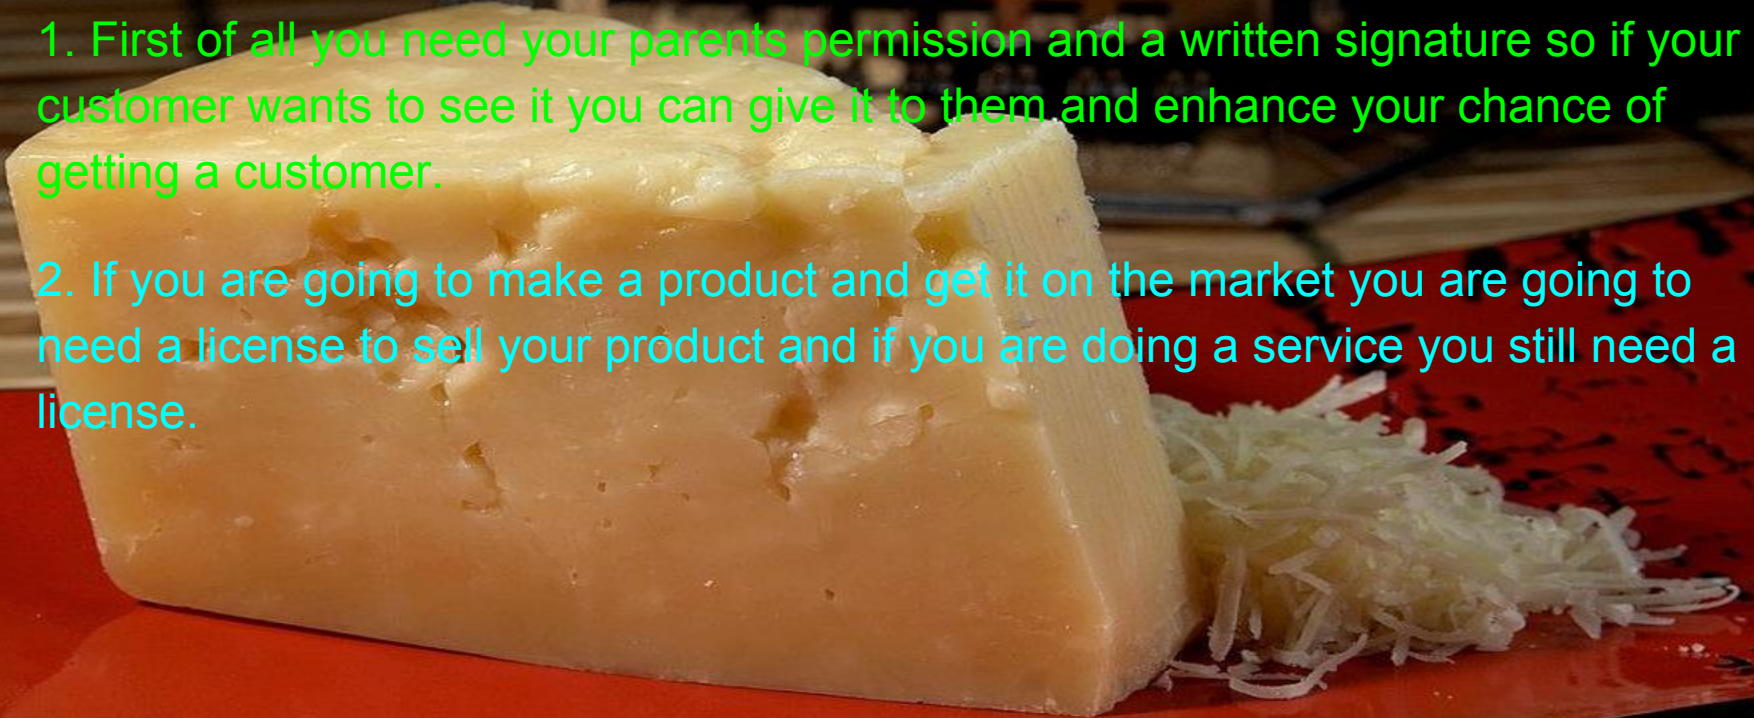

If you wanna make some quick cash and have more money over the long run then read my how to and no one else's. SO READ IT RIGHT NOW YOU HEAR ME! Sorry for screaming so loud, but please, go ahead and read my how to about running a business (but no one else's). You have to promise me that you will read no one else's.

# Parmesan Wait I Mean Permission...

1. First of all you need your parents permission and a written signature so if your customer wants to see it you can give it to them and enhance your chance of getting a customer.

2. If you are going to make a product and get it on the market you are going to need a license to sell your product and if you are doing a service you still need a license.

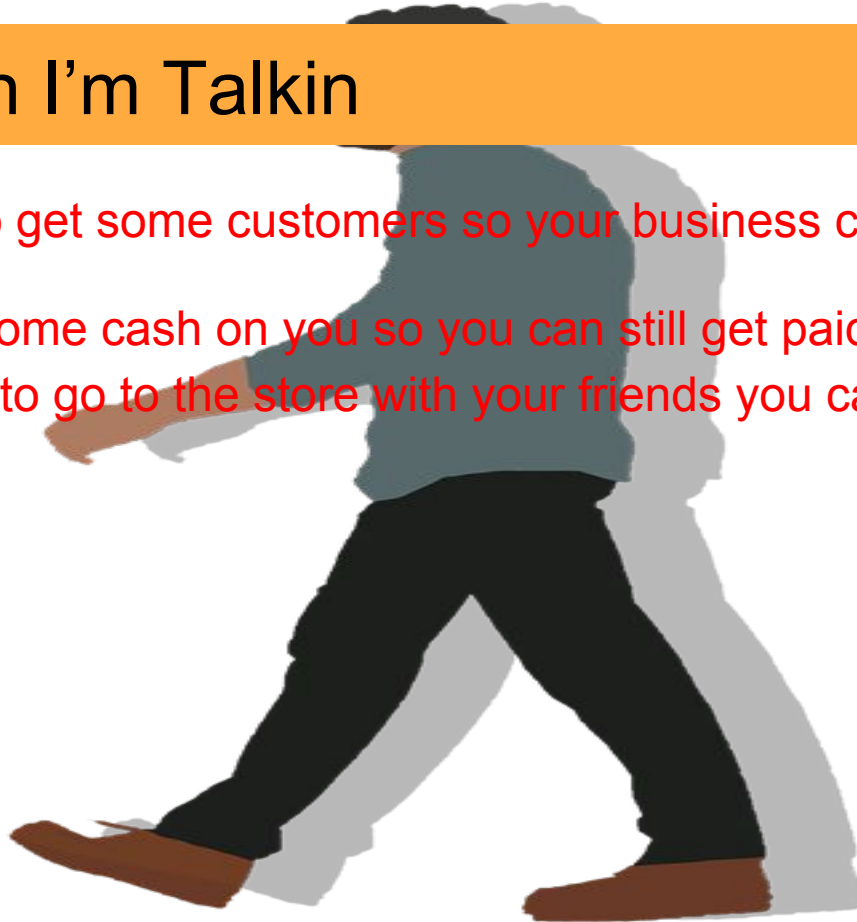

# Down to Business

1. You need to find out what kind of business you want. Here are some examples

[Jobs For Kids | Summer Job | Babysitting | Saving Money - Kidzworld](#)

# Walkin When I'm Talkin

1. You need to go get some customers so your business can thrive.
2. Always keep some cash on you so you can still get paid if they only have big bills. Or if you want to go to the store with your friends you can have some cash to go shopping.

# Beedo, Beedo Lock the Safe

1. Always keep your money somewhere safe so a pesky sibling or your parent can not “borrow” some money.
2. Keep it well hidden and away from where people would suspect it to be. It is always a good idea to get a metal safe with a key and pin code.

# Makin that dollar

Goodbye I hope you enjoyed this howto and kept your promise to not read anyone else's how to. Hope you read one of my other how to soon.hope you have a good life and a happy new year.
